YTD Return	-15.2%

Performance Since Launch (US\$)

Investment Objective

The Fund's objective is to provide its shareholders with risk-adjusted returns which exceed the MSCI Asia free ex-Japan (US\$). It invests principally in other funds that are managed by boutique fund managers in Asia ex-Japan that have worked in the region for several years, have in-depth knowledge of companies in the region, employ a bottom-up, value investing style, and generally have limited assets under management. The Fund's underlying holdings have a bias towards small and medium capitalization equities and companies serving the burgeoning Asian consumer sector. The benchmark figures used for comparison do not include dividends. We estimate that if dividends, net of withholding taxes, are included in the benchmark returns, the benchmark returns would increase by around 2.5 percentage points per annum. The performance of the Fund does not include fees charged in clients' segregated accounts, which are the higher of 1% of assets or 10% of any gains above the high-water mark.

Year-by-Year Return Since Launch (%)

Investment Advisor Commentary

The average P/E of the Fund's holdings is lower than at any time in the past six years with the exception of the brief but sharp decline in equity markets globally in March/April 2020. Six years ago, the Fund had only 13% of its assets invested in India. High quality Indian equities have always commanded higher valuations so this skews the comparison of the Fund's average P/E with prior periods. In a world where geopolitical risks have risen, our approach of balancing the Fund's exposure between Greater China, India and the ASEAN region tempers the Fund's risk.
